

VUSC 2021FA–2022FA (10th day) Retention for TUG

Note: Retention rate was calculated from Fall 10th day of 2021 to Fall 10th day of 2022. Following students were excluded from the 2021-2022 retention pool: 1) students who graduated or were accepted for commencement in 2021 Fall, 2022 Spring, and 2022 Summer, 2) students who are non-degree with the student-at-large status. Student who transferred from TUG to PS in 2021 were also counted “returned” (per Provost after discussion with ALO, Registrar, and IR on 9/24/2015).

- Retention by Cohort Types

- **First-time** (IPEDS definition): A student who has no prior postsecondary experience attending any institution for the first time at the undergraduate level. It includes students enrolled in the fall term who attended college for the first time in the prior summer term, and students who entered with advanced standing (college credits or postsecondary formal award earned before graduation from high school). In Vanguard, STAL Admit Status= FF & New Student Indicator = New.
- **Transfer-in** (IPEDS definition): A student entering for the first time but known to have previously attended a postsecondary institution at the same level (e.g., undergraduate). This includes new students enrolled in the fall term who transferred into the institution the prior summer term. The student may transfer with or without credit. In Vanguard, STAL Admit Status= First Transfer (FT) or TR (Transfer), not Readmit, & New Student Indicator = New.

- Retention by Cohort Type for New Students entering 2021 FA

Cohort Type	Retention Pool	Returned	%
First-Time	494	357	72.27%
Transfer-in	99	79	79.80%

- Retention by Cohort Type for New and Returning Students

Cohort Type	Retention Pool	Returned	%

- Commuter x Gender

Commuter/Resident	Gender	Retention Pool	Returned	%
Commuter	Female	383	303	79.11%
	Male	188	149	79.26%
	Total	571	452	79.16%
Resident	Female	573	464	80.98%
	Male	241	194	80.50%
	Total	814	658	80.84%

NOTE: It should be noted that the **resident retention (80.84%) is higher than the commuter retention (79.16%)** again, after being lower than it for two years in a row. Resident students historically showed higher retention rates than commuter students. Commuter retention increased by about 2.8% from the last year (76.32%) while resident retention increased by 0.6% from the last year (80.23%). It was speculated that the campus closing or having limited capacity (due to the pandemic) caused the lower retention of resident students the previous two years. Female commuter retention (79.11%) decreased from last year's (81.43%) while male commuter retention (79.26%) slightly increased by 1.92% from the last year (77.34%).
