

### VUSC 2019FA–2020FA (10<sup>th</sup> day) Retention for TUG

Note: Retention rate was calculated from Fall 15<sup>th</sup> day of 2019 to Fall 10<sup>th</sup> day of 2020. Following students were excluded from the 2019-2020 retention pool: 1) students who graduated or were accepted for commencement in 2019 Fall, 2020 Spring, and 2020 Summer, 2) students who are non-degree with the student-at-large status. Student who transferred from TUG to PS in 2020 were also counted “returned” (per Provost after discussion with ALO, Registrar, and IR on 9/24/2015).

- Retention by Cohort Types

- **First-time** (IPEDS definition): A student who has no prior postsecondary experience attending any institution for the first time at the undergraduate level. It includes students enrolled in the fall term who attended college for the first time in the prior summer term, and students who entered with advanced standing (college credits or postsecondary formal award earned before graduation from high school). In Vanguard, STAL Admit Status= FF & New Student Indicator = New.
- **Transfer-in** (IPEDS definition): A student entering for the first time but known to have previously attended a postsecondary institution at the same level (e.g., undergraduate). This includes new students enrolled in the fall term who transferred into the institution the prior summer term. The student may transfer with or without credit. In Vanguard, STAL Admit Status= First Transfer (FT) or TR (Transfer), not Readmit, & New Student Indicator = New.

- Retention by Cohort Type for New Students in 2019 FA

Cohort Type	Retention Pool	Returned	%

Resident	Female	559	448	80.14%
	Male	274	225	82.12%
	Total	833	673	80.79%

NOTE: It should be noted that the **resident retention (80.79%) is lower than the commuter retention (82.74%)** for the first time (Resident retention has been always higher). Commuter retention increased by about 1% from the last year (81.82%) while resident retention decreased by 2.22% from the last year (83.01%). It was speculated that the campus closing due to the pandemic caused the lower retention of resident students this year. Female commuter retention (84.78%) remained similar to the last year's (84.26%) while male commuter retention (78.62%) increased by 1.24% from the last year (77.38%).
